

Canine Behavioral Assessment & Research Questionnaire

The C-BARQ (or Canine Behavioral Assessment and Research Questionnaire) is designed to provide dog owners and professionals with standardized evaluations of canine temperament and behavior. The current version consists of 101 questions describing the different ways in which dogs typically respond to common events, situations, and stimuli in their environment. The C-BARQ is simple to use, and can be completed by anyone who is reasonably familiar with a dog's typical, day-to-day behavior. On average, it takes from 10-15 minutes to complete.

NOTE: The C-BARQ is not designed to assess the behavior of dogs less than six months of age. If your dog is not yet six months old, we recommend assessing him or her at a later time.
